Note. See appendix A for explanation of column captions. For more detailed historical statistics for these industries see table 1 of the corresponding chapter of the 1954 Census of Mineral Industries, Vol. 1.

Standard Notes: - Represents zero (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

• Represents number of mines, culm banks, and dredges.

Represents anthracite (producing operations only) and anthracite stripping services. Data are not available for anthracite services other than stripping.

Represents producing operations only.

Represents number of preparation plants and dredges.

Figures for average employment were converted to full-time equivalents.
Represents anthracite stripping services only.

Represents number of employees engaged in all contract work and payments for all contract work as reported by companies.

Represents the clean-coal equivalent of all coal

Represents the clear-cut equivalent of all coal mined, including coal produced and used at the same establishment for power or heat. Coal mined by the Anthracite Mining Services Industry is included in the production shown for the Anthracite Industry.

Cost limited by the Minerals Mining Services industry is included in the production shown for the Minerals industry.
